

ABSTRACT

IAF20 Rec'd PCT/PTO 15 DEC 2005

New ligands for the ORL-1 receptor are described, useful for modulating the activity of said receptors in a patient in need thereof, and for preventing and treating illnesses dependent on the stimulation of this receptor. The new compounds conform to structural formula (I),

(I)

wherein Q is a moiety of formula:

and R , R^0 , R^1 , R^2 , R^3 , R^4 , R^5 , R^6 are further defined in the description.
